The NAHN and Pfizer are pleased to present:

Pentavalent meningococcal vaccine and a vial adapter: closing the gap on adolescent immunization

Please join us for a 30-minute online presentation providing:

- Discussion of the updated meningococcal ACIP recommendation
- Review of current meningococcal vaccination coverage gaps for A, B, C, W and Y meningitis serogroups
- Training on use of vaccine vial adapter

Presented by Guaniri Mateu-Petit,
Pfizer Vaccines Field Medical Director

Dr. Mateu-Petit is a Vaccines Medical Director at Pfizer. She has expertise in the areas of virology, molecular biology, cell biology, immunology, vaccine-preventable diseases, vaccine clinical trials, and epidemiology of infectious diseases. She joined the Medical Affairs Department after 12 years of academic career in the US. She transitioned to the private sector from the Influenza Division at the Centers for Disease Control and Prevention where her research was focused on the development, characterization, and evaluation of novel and seasonal influenza candidate vaccine viruses. Since then, her efforts have been dedicated to the field of vaccinology.

March 18th, 8pm Eastern Time
